

## Nokia 7368 ISAM ONT G-240W-C

### Residential Gateway ONT

The Nokia 7368 Intelligent Services Access Manager (ISAM) Optical Network Terminal (ONT) G-240W-C is the answer for home networking delivered by Gigabit Passive Optical Network (GPON). The device has built-in concurrent dual-band Wi-Fi® 802.11 b/g/n and 802.11ac networking with triple-play capability that simplifies the home equipment experience. It can provide triple-play services with voice, video and data and high-capacity Wi-Fi connectivity. The 7368 ISAM ONT G-240W-C is designed to take advantage of Nokia award-winning management platforms. These include a customized Motive™ Home Device Manager, which is integrated with the Nokia 5520 Access Management System (AMS) platform to deliver a uniform end-to-end operations, administration, and maintenance (OA&M) solution that carrier need in order to provide subscriber satisfaction.

This indoor ONT is designed to deliver triple-play services (voice, data and video) to residential subscribers. Voice services are provided through two POTS ports with an integrated analog telephone adapter (ATA) that converts voice traffic into Session Initiation Protocol (SIP). Connectivity to an existing PSTN Class 5 switch is supported through SIP with direct interoperability with a variety of soft switches / voice application servers. Ethernet connectivity is available on four Gigabit Ethernet (GE) ports, all of which have the ability to burst up to a full gigabit dynamically. Service providers can deliver video using IP packets (IPTV). Rely on dual-band Wi-Fi to support the widest range of customer devices. The IEEE 802.11ac standard enables gigabit speeds on many newer devices. And the widely supported 802.11b/g/n standard can simultaneously connect to legacy devices.
